

Successful Conclusion of Reverse Engineering Training at FPCL (FFBL Power Company Limited)

In a significant advancement for industry-academia collaboration, a five-day Reverse Engineering training program recently concluded at FFBL Power Company Limited (FPCL), executed in partnership with NED University of Engineering and Technology. This training initiative aimed to equip participants with hands-on experience in reverse engineering practices, particularly valuable for emerging mechanical engineers.

The event included an extensive plant orientation, where attendees gained practical insights tailored specifically for the field. The highlight of the ceremony was the awarding of completion certificates to participants, acknowledging their dedication and hard work. Additionally, the top three performers in the program earned prestigious internship positions at FPCL, opening further avenues for real-world industry exposure.

Expressing gratitude, NED University commended the FPCL management for their unwavering support in nurturing skill development and fostering essential industry ties that benefit both students and professionals. This collaboration underscores the commitment of FPCL and NED University to empower future engineers and advance Pakistan's technical landscape.
