

Industrial Visit to Artistic Fabric Mills 2022

On June 8, 2022, the Department of Mechanical Engineering organized a student visit to Artistic Fabric Mills. This company is a top-notch denim manufacturer, offering the latest in sustainable denim solutions to makers around the world. With 70 years of business history, they have specialized in denim since the 1990s. They have a fully integrated fabric manufacturing process, from recycling fibers and spinning yarn to creating denim in various innovative colors and finishes. The company employs about 4,000 people and has offices in Pakistan and Spain. Their global presence spans Asia, Europe, and North America, and they work closely with all major denim brands. Their vision is to grow sustainably with a business model focused on circularity.
