## ASME NEDUET PRESENTS: Industrial Visit to Karachi Shipyard and Engineering Works Ltd.

Karachi shipyard is of the major mechanical engineering industry of Pakistan. Although it is mainly designed for ship building but it also works in developmental engineering. It has vast experience in manufacturing of boilers and pressure vessels of International standards.

They serve maritime and industrial sectors with their full expertise and also work in developmental engineering which helps them to achieve self-sufficiency and reliance.

They have a mission to be the best Ship industry in this region. They achieve their objectives in the fields of ship building and repairs and provide their customers the best possible product.

So buckle up for 14th January 2020 and reserve your seat to gain the knowledge of Pakistan's leading company towards technical development which is achieving self-reliance and indigenization. We hope to see you soon aboard with us.
