

Mechanical Engineering Objectives

- To achieve excellence in teaching and research in the diversified field of Mechanical Engineering
- To produce theoretically and technically sound professional engineers who have strong fundamental as well as state-of-the-art knowledge
- To collaborate with industry and form strategic partnerships
- To contribute to the maximum possible extent in resolving the challenges to the industry and nation
- To encourage our graduates and faculty members to expand their knowledge and pursue advance degrees in engineering
- To promote creative thinking, competitive environment, team participation, professional activities and, moral and ethical value
